# A-Frame Gooseneck

Trailer Option

More Strength. More Stability. More Storage. Take on bigger jobs with our A-frame gooseneck, designed to shift more weight to your tow vehicle for greater hauling capacity and stability. It features an 84" swing clearance, a 39" truck clearance height, and comes standard with a 2-5/16" gooseneck coupler, with an optional fifth-wheel king-pin hitch for added versatility. Plus, the built-in tool tray keeps your gear secure and within reach because efficiency matters.

## Highlights

- **Increased weight distribution:** the A-frame design allows for better weight distribution to the tow vehicle.
- **Improved maneuverability:** the gooseneck hitch connection allows for a tighter turning radius and easier navigation compared to bumper pull trailers.
- **Better weight transfer:** with the hitch over the truck's rear axle, weight is better distributed to the towing vehicle, leading to improved stability and braking performance
- **More cargo space and versatility:** includes a standard integrated lockable toolbox on top of the gooseneck. For additional storage, an optional lockable chain box with a chain bar can be mounted between the gooseneck frame uprights. Also allows for an optional top deck to further expand capacity.
- **Long lasting finish:** our advanced polyurethane paint system, combined with a rust-inhibiting primer, provides superior durability and weather resistance. Comes with a 3-year paint warranty.

## Your benefits

- **Customization:** select your hitch type and adjust the fifth-wheel height to match your tow vehicle's configuration, ensuring a precise and secure fit for your hauling needs.
- **Versatile compatibility:** available on multiple different trailer models, providing the flexibility to tackle a wide range of jobs with confidence and efficiency.
- **Industry leading warranty:** our frames are manufactured to last, so we offer an industry leading lifetime frame warranty.
- **Quality and ROI:** built for durability and performance, our trailers offer long-term value with minimal maintenance costs. Backed by an industry leading warranty, we provide a superior return on investment by keeping your equipment on the road longer, ensuring reliability for years to come.
